The Wild Horse Research Team Seminar **Chris Pollitt (BVSc, PhD) and Brian Hampson (PhD scholar)**

The team is headed by world renowned equine foot researcher Professor Chris Pollitt of the Australian Equine Laminitis Research Unit. Brian Hampson is a PhD scholar in this team and handles the day to day work, including data collection, processing and presentation. See below the topics covered in this seminar.

If you are a vet, farrier, hoofcare professional, or simply interested in the latest hoof and feral horse research, then you cannot miss this seminar. Proceeds go towards this research.

- | | |
|---|---|
| <p>Chris Pollitt:</p> <ul style="list-style-type: none"> • Our current understanding of foot anatomy • Current trends in laminitis pathogenesis and management • The 3D hoof seen through CT studies • The film: "The desert brumby" <p>Brian Hampson:</p> <ul style="list-style-type: none"> • History and habitat of feral horses in Australia and New Zealand | <ul style="list-style-type: none"> • Foot form and structure of Australian and New Zealand feral horses • Domestic and feral horse GPS studies • Pathology of the Kaimanawa and Australian feral horse • Sole depth in domestic and feral horses • The brumby swap experiment • Are feral horses born with modified feet? |
